

## COVID SPECIFIC FUNCTIONALITIES

**Objective: At the completion of this section, the learner will know the:**

- Correct way to use the Mass Vaccinator functionality
- COVID-19 Patient List
- COVID-19 Second Dose Report
- COVID-19 Doses Added Report

### Mass Vaccinator

While conducting a mass COVID clinic, a user can be inundated with many patients to add and shots to enter in a relatively short period of time. To assist with this issue, a user can use the Mass Vaccinator functionality. Please be advised this feature is only to be used when the patient **is not** found in ImmPRINT. Begin by searching for the patient as one normally would. If the patient is not found after three searches using different search parameters, click on the “Mass Vaccinator” drop down followed by clicking on the “Mass Vaccinator” link.
